

LAB-PRO GmbH

Performance due to Innovation

The solution from the laboratory to the production system out of one hand

LAB-PRO GmbH is the competent supplier of innovative over-all solutions in the discontinuous textile finishing for the increase of your business efficiency.

Our range

We and our staff have been engaged for decades in the development, production as well as the marketing and service of modern textile finishing machines for the laboratory and the production.

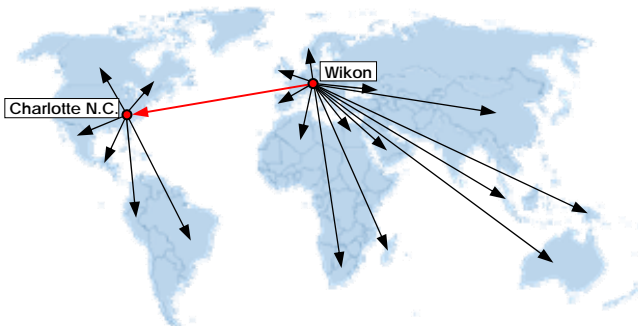

We offer you:

- Development, production and sale of various textile dyeing machines, central systems and hydro-extractors
- Development and sale of laboratory equipment
- Spare parts service for various dyeing machines
- Repair, modification, upgrades and servicing

Pilot plant in Burladingen

At LAB-PRO LTD in Burladingen/ Germany a pilot plant is at your disposal for dyeing trials.

Worldwide distribution net

Our sales partner in Charlotte/USA attends to the sales and after-sales service in the Americas. Customers around the globe confirm daily the profitability, precision and reliability of our installed systems.

Make your challenge our business!
